OUR HIGH TECHNOLOGY DISINFECTANTS

Nano Technological / Water Based / Odorless / Metal Free / Ecological
Surface Disinfectant at least 30 Days Protective Effect
Hand and Body Disinfectant 24-Hour Protective

In case of contact with the surface, the cell membrane of the microbe is broken down by our disinfectant and its life is ended. Thus, germs cannot attach onto the surface under protection, they cannot settle and spread by forming colonies. The operating system is mechanical. By this way, it does not let microbes mutate and form super microbes by re-adapting the environment. The operating system is fast, efficient, safe and long-term.

LONG-LASTING PROTECTION IS THAT EASY

Our experienced team applies our disinfectant with ULV devices in the most appropriate ratio to the environment.

APPLICATION

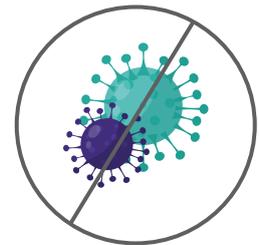

No more germs, viruses, bacteria, mold, fungi, etc. As soon as micro-organisms touch the surface, nano swords hit the shield of it and shatter. Its spread completely stops.

DRYING

The active substance spreads with water in our disinfectant and completely attaches to the surface in nano-size after the surfaces are dry and become part of the surface. Your nano shield is ready!

PROTECTION

Since the fogging or dry steam method requires hot application, it reduces the effect of disinfectants. Also, because glycerin requires burning, there is a heavy load on the lungs. It may be better not to use these methods.

Although silver ion products provide disinfection, metal residue remains on the surface. It may not be suitable especially for food producing places.

Surface Solutions

Zone Shield Permanent Protection Up to 30 Days Effective Antimicrobial Surface Solution

Zone Shield approved by Ministry of Health, FDA, EPA and suitable for public health physically destroys all kinds of bacteria, viruses and disease-causing microorganisms, including hospital germs. Also prevents algae, fungal formation.

100 ml, 1 lt, 5 lt, 20 lt and tissue, sachet forms are available.

Hand and Skin Solutions

Zone Shield 24 Hours Permanent Protection Antimicrobial Hand and Skin Solutions

Zone Shield approved by Ministry of Health, FDA, EPA and suitable for public health protects the skin for a long time by creating nano swords coating on the skin . Odorless, water based and harmful chemical free, this special product is nanotechnological.

100 ml, 1 lt, 5 lt, 20 lt and tissue, sachet forms are available.

THEY RELIED ON OUR DISINFECTION SOLUTIONS.
